## PROFESSIONAL SUMMARY

*A full-stack creator optimizing tech for life to the fullest.*

## EXPERIENCE

### Sr. Frontend Software Developer

2022 – PRESENT

AdventHealth

- Helped re-invent industry leading health care app in React Native / Expo.
- Originated and led architectural vision for a provider search and schedule standalone React Native application, leveraging the CUI design system to unify the healthcare experience across platforms.
- Primary code reviewer for Search and Schedule; identifying OWASP Top 10 vulnerabilities and architectural weaknesses pre-production.
- Entirely re-worked provider-patient messaging and telehealth experience and design.
- Early adopter of AI-assisted development tools (opencode, Claude, Codex) to daily to accelerate delivery, improve code quality, and prototype rapidly.

### Full-Stack Developer

2021 – 2022

The Roundtree Agency

- Rapidly translated Figma designs into user-facing experiences using Wordpress *et al*, working directly with creative director and mentoring a junior developer.
- Introduced headless WordPress patterns — static site configuration, Gutenberg React Components, and JSON-API for Atlas — improving site architecture and delivery velocity.
- Sole DevOps engineer, managing dozens of websites; migrating and deploying; updating and debugging; administering relational databases.

### Front End Web Developer

2018 – 2021

Wycliffe Bible Translators, USA

- Solo-prototyped complete Wycliffe.org redesign, headless React + Strapi POC, integrating diverse information systems and WorldPay E-Commerce.
- Primary Drupal front end developer for Wycliffe.org.
- Solo-built LingoLab full-stack SPA (MongoDB, Node.js, React) with SendGrid email automation, printing, and social media.
- Built Raspberry Pi museum kiosks (Socket.io, Linux), BibleShare real-time audio/video app, and prototyped the React VR museum experience.
